High Thrill Drops

Offering a combination of sensations including inner-tubing, drops and going vertical as riders shoot up a wall and pause, then fall back to experience a shot of weightlessness over a transition hump and into a splashdown pool below.

FAMILY boomerango

Chime Long Waterpark
Guangzhou, China

PRODUCT FEATURES:

- add an enclosed AquaTube to build anticipation to the impending drop ahead
- a reversed free-fall accelerates riders over a six-foot high transition hump, and then into a splashdown pool
- entry options: launch conveyor or entry tray
- available in single and double inner-tubes or family raft version, allowing riders to 'go it alone' or share the ride experience
- suitable for indoor and outdoor installations
- our dry option makes the perfect attraction for any amusement park
- strong visual and spectator appeal attracts customers and keeps them coming back, again and again
- fully-enclosed version makes a thrilling dark attraction
- add one of our exciting entry options or combine with a SuperBowl to create the ultimate watersliding experience

Riders start in a raft with a steep drop down, then propel high up a vertical wall.
